

Uterine Artery Pulsatility Index (UAPI)

Image Submission Requirements

- Three (3) images are required - Doppler assessment of the Uterine Arteries that demonstrate colour flow mapping and waveforms of the uterine artery at 11 – 13 weeks gestation
- The images submitted should represent the operators most recent work
- Only **electronic images** are to be submitted (NB: thermal and photo images will no longer be accepted)
- Images are required to be de-identified in the interest of unbiased and fair assessment
- Patient and site details need to be cropped or blacked out using an image editing tool e.g. Microsoft Paint
- Original time and date stamps of when the scan was performed must **remain** on the image
- Images may be from the same patient if one image is of the left artery and one image is of the right artery. It must be clearly labelled which is the left and which is the right. Please do not send two UAPI images that are of the same artery and patient, or images will be returned
- Electronic image files should be in .jpg or .jpeg format and be named as “Image 1.jpg”, “Image 2.jpg” etc. then imported into a PowerPoint file. Name the PowerPoint file with your ID: number. Send the image submission attached to an email to: - nuchaltrans@ranzcoq.edu.au
- Images will be returned if these requirements are not met.
