

NUCHAL TRANSLUCENCY

ultrasound, education and monitoring program

The fee structure for audit within the Nuchal Translucency – Ultrasound Education and Monitoring Program are shown below. These fees are effective from 1 July 2020. The fees reflect the costs borne directly by the program.

ITEM	FEE
Site Fee & Annual Report Fee	\$459.09+ GST
Operator Fee (per operator)	\$114.55+ GST

Please note the annual audit is **retrospective** and includes all operators who performed ten or more scans at the centre during the audit year. A centre's audit year begins from the end date of the last audit period and finishes on the final date listed in the export audit data file (for instance, a centre with a July 2020 audit period could have an audit period from 1 July 2019 to 30 June 2020).

Below is an **example** for a centre that had five operators and a July 2020 audit.

Centre 10000:	Site Fee & Audit Report Fee July 19 – June 20	5 operators worked at the centre from July 19 – June 20	GST	Total invoice for July 20 audit
	\$459.09	\$572.75	\$103.18	\$1135.02
